

ENVIRONMENTAL RESOLUTIONS, INC.

July 12, 2005
ERI 203403WW.L16

Mr. Warren Wiseman
1400 Farmers Lane
Santa Rosa, California 95401

Subject: Notification of Drilling Activities, Former Exxon Service Station 7-0276,
1400 Farmers Lane, Santa Rosa, California.

Mr. Wiseman:

At the request of Exxon Mobil Corporation (Exxon Mobil), Environmental Resolutions, Incorporated (ERI) is notifying you of upcoming field work at and near the subject site. Field work will include drilling seven on-site soil borings (B19 through B25) and four off-site borings (B26 through B29), and collecting soil and groundwater samples from the borings. Proposed boring locations are shown on the attached Generalized Site Plan. Work is being performed at the direction of the California Regional Water Quality Control Board, North Coast Region (Regional Board). Field work is scheduled to occur August 19, 2005, and is anticipated to be complete in one day.

Soil cuttings and rinsate water from drilling activities will be placed in 55-gallon drums and stored at the site pending characterization and disposal. Upon receipt of laboratory analytical results of soil samples from the drums, ERI will coordinate with Exxon Mobil for disposal of the soil and water. ERI appreciates your cooperation to ensure that field work occurs safely and efficiently, and will minimize disruptions to station operations while on site.

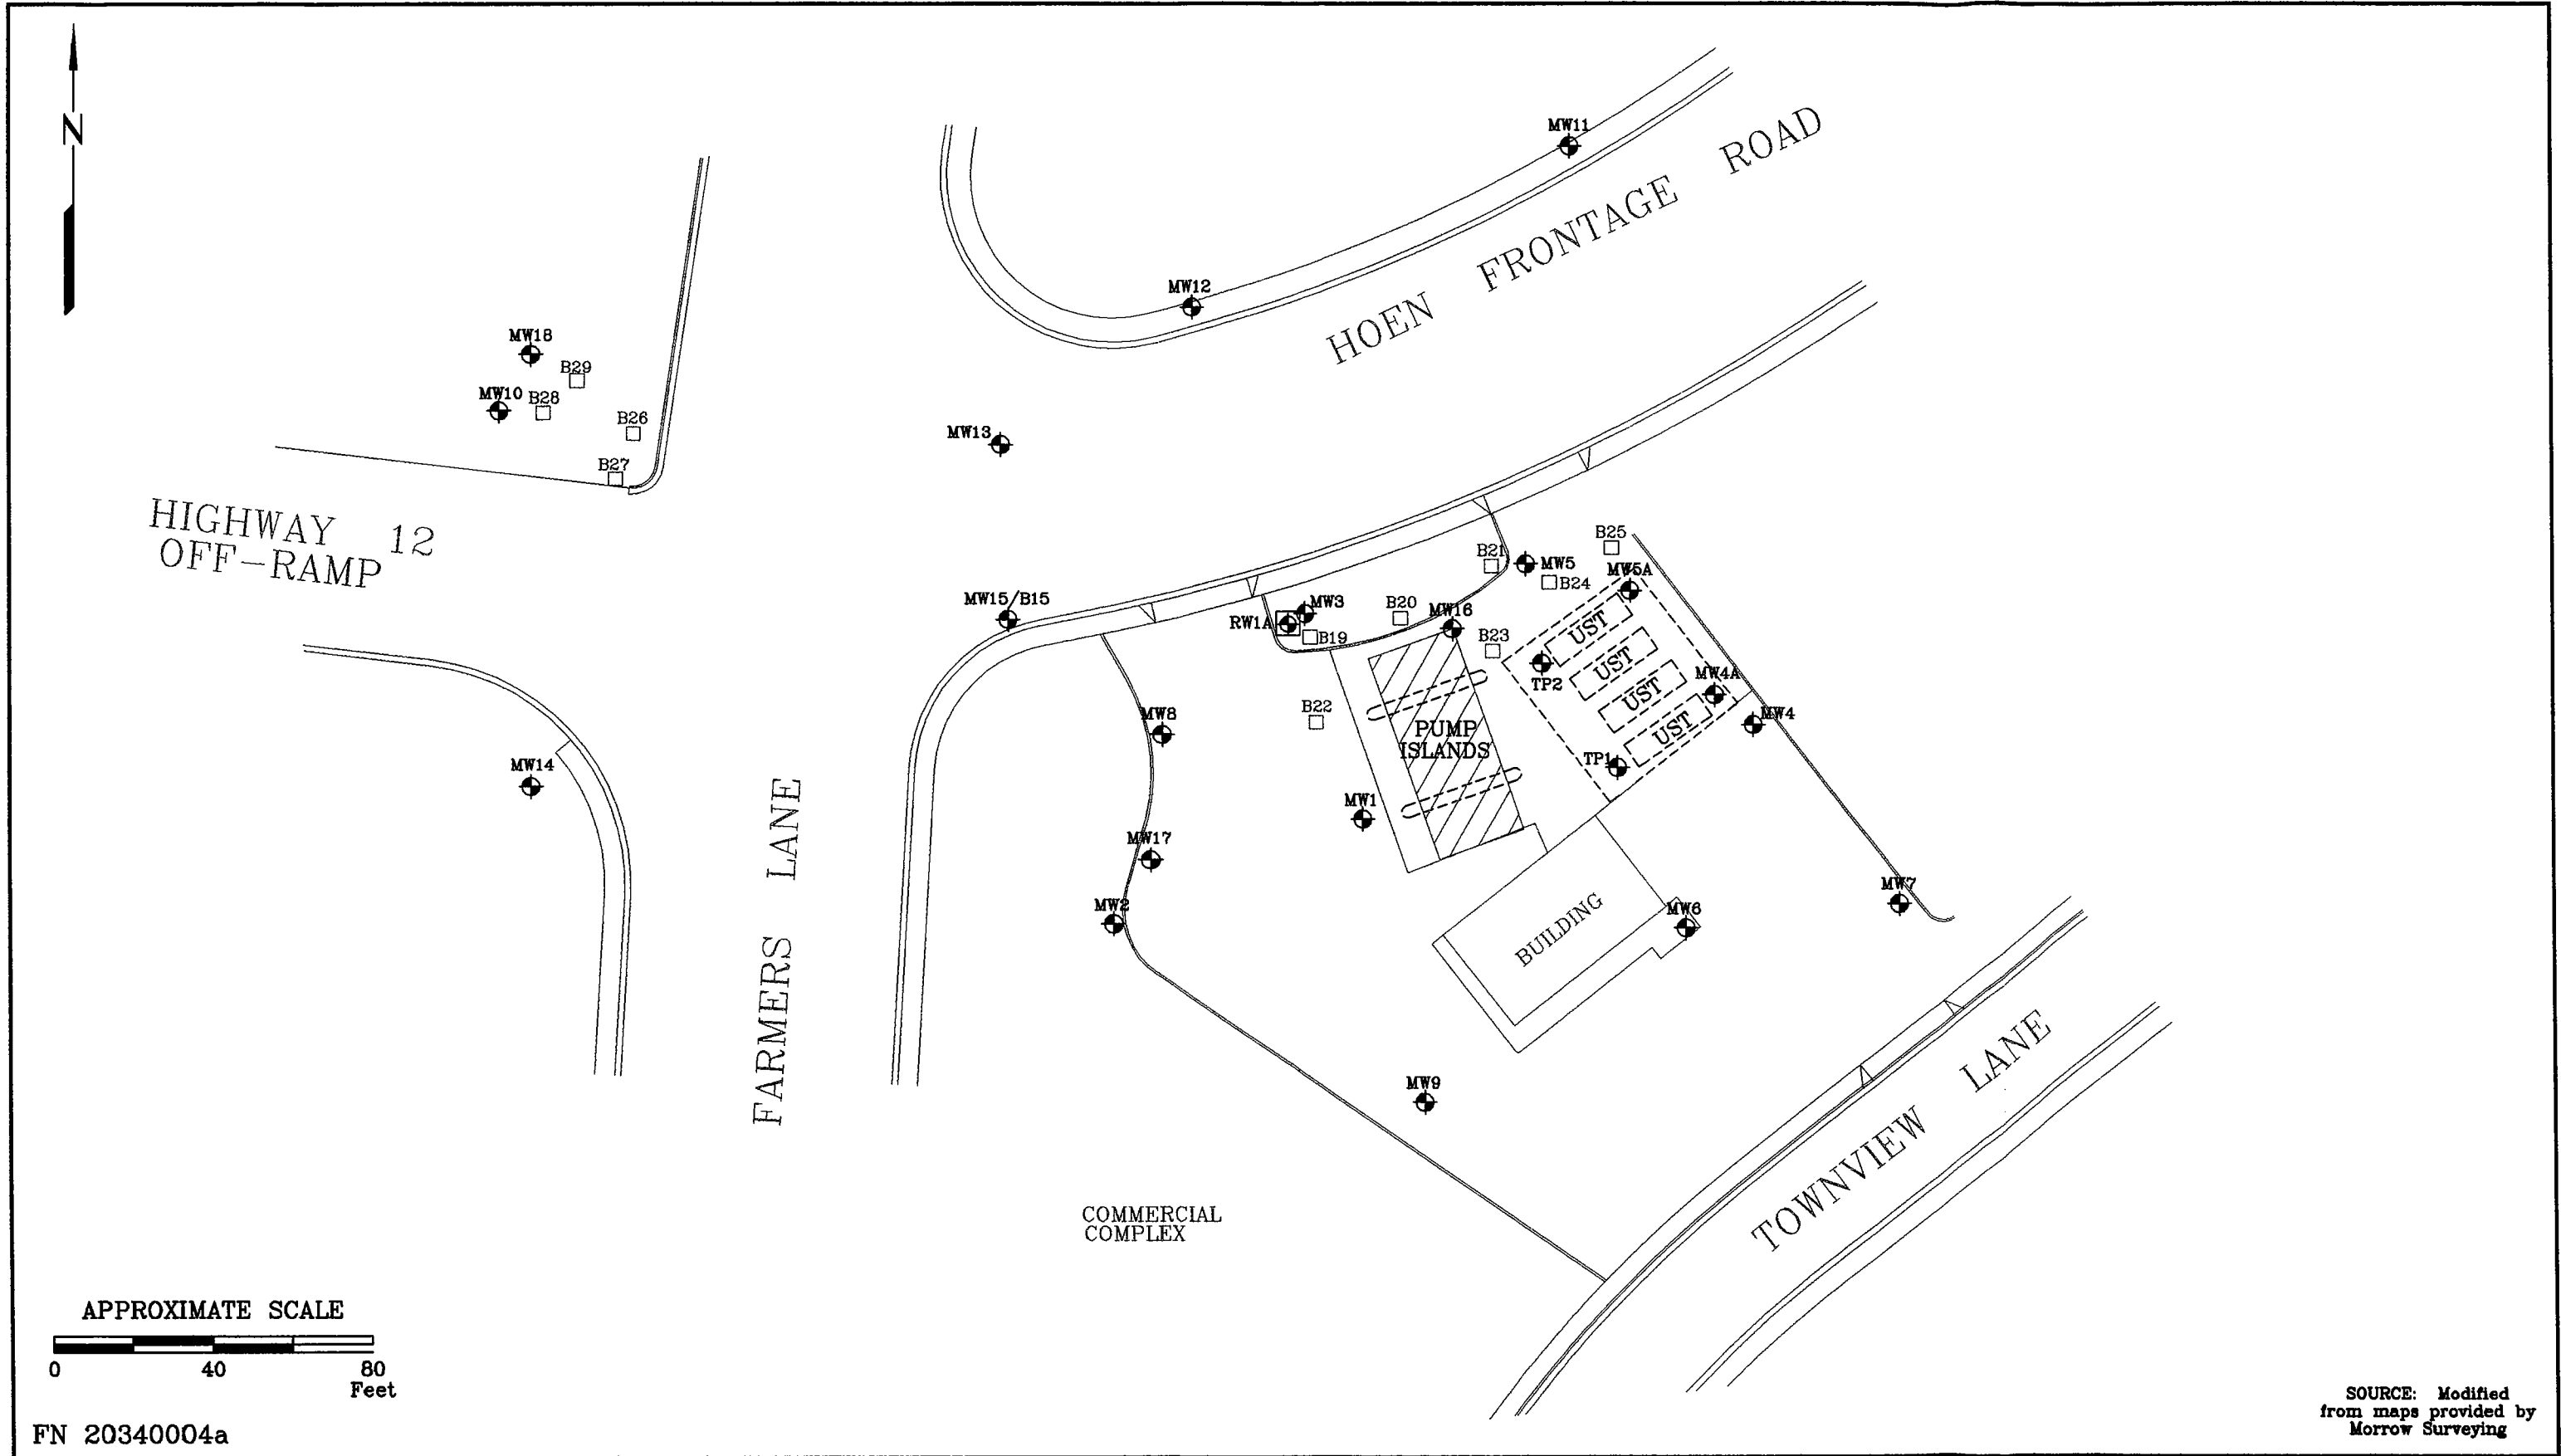

Please call Ms. Paula Sime, ERI's project manager for this site, at (707) 766-2026 with any questions regarding the work.

Sincerely,
Environmental Resolutions, Inc.
